EDUCATION

Ontario Tech University

Oshawa, Ontario

BEng in Software Engineering

Expected Graduation, May 2028

- o **GPA:** 4.2/4.3, *President's Honours List*
- o **Related Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Architecture, Operating Systems, Artificial Intelligence, Computer Networks

WORK EXPERIENCE

SOTI

Mississauga, Ontario

Software Developer Intern

May 2026 – April 2027

- Engineered a production Android meeting room app using Jetpack Compose and Hilt DI; increased test coverage from 17% to 76% via JUnit 5, ensuring robust deployment across corporate headquarters.
- Resolved 30+ technical tickets within the first month post-training, addressing critical memory leaks and redundant HTTP requests in a cross-platform telemetry dashboard using Promise reuse to optimize UI routing.
- Developed an award-winning full-stack ticketing application utilizing Angular and ASP.NET Core/C# within an Agile framework, securing "Best Project" among the summer intern cohort.

Ontario Tech University

Oshawa, Ontario

Web Intern

May 2025 – April 2026

- Automated CMS event page generation by developing a custom JavaScript, PHP, and SOAP submission system, effectively eliminating manual data entry bottlenecks for non-technical staff.
- Engineered data-parsing algorithms to restructure complex JSON datasets and utilized Git for rigorous unit testing, successfully deploying stable feature updates to the production Tuition Calculator.

PROJECTS

[ER Intake and Triage Platform](#)

HackHive 2026

Full-Stack Developer

January 2026

- Engineered a full-stack ER triage platform (PHP, MySQL, JS), integrating the Gemini API to analyze symptoms and automatically assign ESI levels, mitigating subjective bias in patient pain reporting.
- Developed a predictive machine learning model utilizing scikit-learn to calculate dynamic patient wait times based on AI-assessed severity and real-time hospital queue logistics

[Electric Vehicle Battery Health Predictor](#)

Oshawa, Ontario

Team Lead

October 2025

- Directed a 5-person team to engineer a Python-based data pipeline and linear regression model (Pandas, scikit-learn), achieving an R^2 of 0.989 for EV battery health prediction

[AI Mental Health Assistant](#)

HackHive 2025

Backend Developer

February 2025

- Designed a real-time AI emotional companion using React, Node.js, and external APIs within 24 hours, earning judge commendations for scalable server logic and dynamic sentiment processing.

[Carpool Dashboarding Site](#) - Award Winning Program

Oshawa, Ontario

Team Lead

November 2024

- Built an award-winning carpool tracking web app (HTML, PHP, MySQL) by designing relational schemas and optimizing SQL queries to scale user metrics and reduce carbon emissions by up to 50%.

TECHNICAL SKILLS

Languages: C#, Python, Java, C++, JavaScript, TypeScript, SQL, PHP, HTML/CSS

Frameworks & Libraries: .NET, ASP.NET Core, Angular, React.js, Node.js, Jetpack Compose, Pandas, scikit-learn

AWARDS

Best BrightLight Project, 2026 (SOTI) • Top 5 Web Programs, 2024 (Ontario Tech) • Principal's Award for Leadership • Top 25% in Canada (CCC) • Most Improved Program (Queen's Computing Competition)
